gouravkumar23.github.io/profile

Secunderabad, Telangana

EDUCATION

Bachelor of Computer Science, Anurag University

Expected 2026

Relevant Coursework: Data Science with Computer Science and Engineering.

CGPA: 8.79

Schooling, St. Francis De Sales High School

2020

CGPA: 10

EXPERIENCE

Software Development Intern, DRDO – Research Centre Imarat (RCI), Hyderabad Jul 2025- August 2025

Developing a C-based software system to interface with and store data from defense-grade hardware protocols such as **RS-422** and **MIL-STD-1553**.

Implementing a native **Windows GUI using WinAPI** for real-time visualization, control, and diagnostics of connected hardware.

Collaborating with hardware teams to ensure accurate data interpretation, protocol compliance, and low-latency performance.

Skills

Programming Languages

C, Java, Python, Dart, R, PL/SQL

Web Development

FrontEnd: HTML, CSS, JavaScript, Bootstrap

Backend: Flask, Django, Spring, Spring Boot, Servlet, Gradio (Prompting)

Mobile Development

Flutter, Android Studio

Web Tools & APIs

REST API, Firebase Firestore, Supabase, Postman, Maven

Database Management

SQL, MySQL, SQLite3, SQLAlchemy, Firebase, Supabase

AI & Machine Learning

Fundamentals of AI, Machine Learning, DeepLearning and Computer Vision Algorithms, Prompt Engineering, Genai, Agentic ai, MCP Servers, RAG Systems, Context Aware AI Systems, XaI

AI & LLM Tools

Google Gemini API, LangGraph, LangSmith, ollama, dyad, claude

Cloud & DevOps

System Design and Software Archetecture, Docker, Render, Cloudinary, Git, SDLC, Agile, CI/CD

AI Libraries/Platforms

scikit-learn, Hugging Face, Transformers

Data Analysis & Visualization

NumPy, Pandas, Matplotlib, Plotly, Altair, Tableau, Qlik Sense, Pygwalker, R Programming

CS Concepts

Data Structures, Algorithms, Intermediate DSA

Soft Skills

Communication, Interpersonal Skills, Critical Thinking, Problem-Solving, Leadership, Time Management, Strategic Thinking, Innovation

Languages

English (Fluent), Hindi (Fluent), Telugu (Native)

Communication & Presentation

Public Speaking, Technical/Non-Technical Writing, Slide Deck Creation & Delivery

Projects

SmartQuizHub (EduEase) – AI Proctored Examination Platform

Jan 2026 - Present

Intelligent Learning and Testing Platform

React, Firebase, Node.js, Gemini API, Cloudinary

Built an AI-powered examination platform with real-time monitoring and secure session control. Designed a 4-tier architecture integrating frontend, Firebase, backend relay, and AI services. Implemented AI proctoring (face detection, noise analysis, tab tracking), OTP authentication, role-based access, and automated MCQ generation. Introduced Concepts of rooms for targeted Studies and Context AI systems for improved personalized learning techniques.

DANCCES – Distributed Autonomous Network Compliance System

Sep 2025 - Present

Endpoint Network Management

Python, Networking, Security, Systems

Developed a decentralized endpoint compliance system with autonomous enforcement at device level. Implemented cryptographic command validation, real-time heartbeat monitoring, firewall/DNS control, and remote system execution. Designed scalable architecture with Rust (client) and Go (admin) roadmap.

Jan 2026

DataDynamo2 – Hackathon Management Platform

Hackathon Management System

React, TypeScript, Firebase, Cloudinary, Zod QR

Built a full-stack system for managing hackathons with QR-based secure check-ins and role-based dashboards. Implemented real-time announcements, voting systems, Project Allocations and audit logging.

Universal Mailing Service (Render Deployed)

Feb 2026

Mailing Backend

Node.js, SMTP, REST API

Developed a centralized email service supporting OTP, password reset, and notifications across multiple applications. Designed secure API-based mailing system with authentication and scalable deployment.

AgileAI: Intelligent Scrum Master Assistant with Automation & AI Guidance

Sep 2025

AI Based Scrum Assistant Software

Built an AI-powered Scrum assistant that automates Scrum Master duties, integrates with WhatsApp, and supports intelligent project and team management for Agile teams. Scales to 1000+ users with real-time features.

Technologies: Gemini API, Whapi, SMTP, Firebase Firestore & Auth, Bolt.new, Flask, Requests

BayMax – AI-Powered IT Incident Summarization

Jan–Mar 2025

AI Platform for IT Incidents

Designed an AI system to summarize IT incidents and provide analytical dashboards for IT management.

Technologies: BART (facebook/bart-base), Gradio, Flask, Firebase, React, Web Analytics

Online Quiz Application

Jan 2025

Java-based Project

Built a web-based platform for hosting and managing online quizzes.

Technologies: Java, Spring Boot, Servlets

ClubEase – Club Management System

Feb 2025

Web App

Created a club management platform with Supabase APIs and real-time frontend data manipulation.

Technologies: JavaScript, Supabase, HTML, CSS

Punch-In System with Auth

Mar 2025

Flutter Mobile App

Developed a sign-in/sign-up and punch-in system with location verification and real-time updates.

Technologies: Flutter, Firebase, Google Maps API

QR Code-Based Food System

Dec 2024

University Community Project

Developed a system where participants can use QR codes provided by event hosts instead of paper food tokens.

Technologies: Python, Flask, Firebase

Gesture-Based Navigation for Presentations

Sep–Oct 2024

Computer Vision Project

Controlled PowerPoint slides using 3 hand gestures for seamless presentation navigation.

Technologies: Python, OpenCV, MediaPipe, PyAutoGUI

Trash Detection System

Mar–May 2024

API-Based Project

Built a system that detects and classifies trash into 3 categories, offering 2 actionable solutions.

Technologies: Python, OpenCV, Gemini API, Front-end

Sleep Data Analysis

Feb 2024

Data Analysis

Analyzed sleep data using Qlik Sense, generating interactive dashboards and insights.

Technologies: Qlik Sense

Certificates

- **C Programming** – Infosys Springboard, Oct 2023
- **C Programming** – Infosys Springboard, Oct 2023
- **C Programming** – Infosys Springboard, Oct 2023
- **Docker for Developers** – LinkedIn Learning, Apr 2026
-
- **C Programming** – Infosys Springboard, Oct 2023
- **Prompt Engineering** – LinkedIn, Jan 2024
- **Qlik Data Literacy** – Qlik, Feb 2024
- **Code Maze** – Anurag University, Sep 2023
- **Blockchain** – Udemy, Oct 2023
- **Data Visualization** – LinkedIn, Jan 2024
- **DSA in Java** – Infosys Springboard, Oct 2023
- **HTML** – Infosys Springboard, Nov 2023
- **Java for Beginners** – Infosys Springboard, Oct 2023
- **NumPy & Pandas** – Infosys Springboard, Nov 2023
- **Schooling Certificates** – St. Francis De Sales, 2020

Responsible Positions

Chief Advisory Chair Person, GeeksforGeeks

Student Chapter, Anurag University

President, Data Analytics Club

- Led and organized 8 events, including a hackathon, with our teams.

Additional Strength: Quickly adapt to new technologies and tools.

Extra-Curricular Activities

- Improve basic communication skills in free time.
- Solve puzzles to enhance logical thinking.
- Play badminton regularly.
- Adventure games to explore creativity.
